Professional Summary

Results-driven Frontend Developer and UI/UX Designer with 2+ years of hands-on experience shipping production mobile and web applications. Delivered 5 end-to-end products across e-commerce, food delivery, and event management using Flutter and React/Next.js. Passionate about translating complex requirements into clean, user-first experiences that drive engagement.

Professional Experience

Frontend Developer / UI/UX Designer · *Yemen Store App* May 2025 – Sep 2025 | Sana'a (Remote)

- Engineered a Flutter/Supabase e-commerce platform targeting Yemeni diaspora in Saudi Arabia, supporting full product catalog, cart, and checkout flows.
- Designed end-to-end UI/UX in Figma, establishing a reusable component library that reduced screen build time across 20+ screens.
- Implemented responsive, animated interfaces with Dart; collaborated via Git/GitHub with zero release-blocking bugs over 13-month engagement.

Full Stack Developer · *Aljazeera Springs Factory — Candy Water App* Jul 2025 – Oct 2025 | Jeddah (Remote)

- Built a dual-app water delivery platform (customer + driver) using Flutter, Node.js, and Supabase, enabling live order tracking via Mapbox.
- Architected backend APIs for orders, products, users, and real-time delivery routing; integrated Firebase push notifications for order status updates.
- Designed modern, accessible UI/UX for both applications, reducing driver task-completion friction through intuitive route management screens.

Frontend Developer / UI/UX Designer · *Event QR — Check-In App* Oct 2025 – Jan 2026 | Sana'a (Remote for KSA)

- Developed a Flutter mobile app for QR-based event access management serving private and public events across Saudi Arabia.
- Built invitation creation, QR code scanning, and real-time check-in flows; optimized UX to reduce average check-in time at event gates.

Software Engineer · *Yemen Soft* May 2024 – Jul 2025 | Sana'a

- Contributed to system analysis, UI/UX design, and feature development for an English language institute management application.
- Collaborated cross-functionally on usability improvements and technical structure, supporting the full software development lifecycle.

Full Stack Developer (Graduation Project) · *University of Science & Technology — Cloud Restaurant* Jul 2024 – May 2025 | Sana'a

- Designed and built a full-featured food delivery app with real-time GPS order tracking via OpenStreetMap, serving Breakfast, Lunch, Dinner, and Healthy menus.
- Managed the complete project lifecycle — requirements gathering, Figma prototyping, Flutter/Firebase development, and QA — delivering on schedule.

Technical Skills

Mobile: Flutter · Dart · Firebase Auth · Firebase Messaging · OpenStreetMap · Mapbox · QR Scanning

Frontend Web: React.js · React Native · Next.js · HTML · CSS

Backend & Data: Node.js · Laravel · Supabase · Firebase

Design & Tooling: Figma · Git · GitHub · Trello
